

srsran::cyclic_prefix
::get_length

srsran::cyclic_prefix
::is_valid

srsran::to_numerology
_value

```
graph LR; A["srsran::cyclic_prefix::get_length"] --> C["srsran::to_numerology_value"]; B["srsran::cyclic_prefix::is_valid"] --> C;
```

The diagram illustrates a mapping or dependency. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'srsran::cyclic_prefix::get_length' and the bottom box contains 'srsran::cyclic_prefix::is_valid'. On the right, there is a single gray rectangular box containing the text 'srsran::to_numerology_value'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'get_length' and 'is_valid' are associated with or mapped to 'to_numerology_value'.
