

uint16_t

```
classDiagram
    class uint16_t {
    }
    class "asn1::rrc_nr::feature_set_c::eutra_s_" {
    }
    uint16_t o-- "asn1::rrc_nr::feature_set_c::eutra_s_"
```

The diagram illustrates an aggregation relationship between two classes. The top class, `uint16_t`, is represented by a white box with a black border and is divided into three horizontal compartments. The bottom class, `asn1::rrc_nr::feature_set_c::eutra_s_`, is represented by a gray box with a black border and is also divided into three horizontal compartments. A blue line connects the bottom compartment of the `uint16_t` class to the top compartment of the `asn1::rrc_nr::feature_set_c::eutra_s_` class. This line terminates in a blue diamond, which is a standard UML notation for aggregation. To the right of the blue line, the text `+dl_set_eutra` and `+ul_set_eutra` is displayed in a light gray font, indicating the specific attributes or methods associated with this relationship.
