

std::true_type

```
graph BT; A["is_char< char16_t >"] --> B["std::true_type"]
```

The diagram illustrates an inheritance relationship between two C++ type traits. At the bottom is a gray box labeled 'is_char< char16_t >', which is divided into three horizontal sections. A blue arrow points upwards from the top section of this box to the bottom section of a white box at the top labeled 'std::true_type'. The 'std::true_type' box is also divided into three horizontal sections.
