

options

```
classDiagram
    class options {
    }
    class "asn1::elap::ul_data" {
        _notif_ies_o::value_c::types_opts
        + to_string()
    }
    options o-- "asn1::elap::ul_data" : +value
```

The diagram shows a class named 'options' at the top, represented by a rectangle with three horizontal compartments. The top compartment contains the text 'options'. Below it is a blue line representing an aggregation relationship, ending in a hollow diamond. To the right of this line is the label '+value'. The diamond connects to the top compartment of a larger, shaded rectangle below. This rectangle is divided into three horizontal sections. The top section contains the text 'asn1::elap::ul_data' followed by two lines of indented text: '_notif_ies_o::value' and '_c::types_opts'. The bottom section contains a plus sign followed by the text 'to_string()'.

+value

asn1::elap::ul_data
_notif_ies_o::value
_c::types_opts

+ to_string()
