

std::false_type

```
graph BT; A["srsran::srsvec::detail::is_arithmetic_span_compatible<T, typename>"] --> B["std::false_type"]
```

The diagram illustrates an inheritance relationship. At the bottom is a grey rectangular box representing the base class `srsran::srsvec::detail::is_arithmetic_span_compatible<T, typename>`. It contains three horizontal sections, with the top one containing the class name. Above this box is a blue arrow pointing upwards. At the tip of the arrow is a white triangular arrowhead. Above the arrowhead is a white rectangular box representing the derived class `std::false_type`. This box also contains three horizontal sections, with the top one containing the class name.
