

uint8_t

The diagram illustrates a pointer relationship. At the top, a white box represents a variable of type 'uint8_t'. It is divided into three horizontal sections, with the top section containing the text 'uint8_t'. A blue line extends downwards from the bottom of this box. To the right of the line, the text '+b_hop', '+b_srs', and '+c_srs' is displayed in a light gray font. The line terminates at a blue diamond shape, which points to the top of a gray box below. This gray box represents a struct and is divided into three horizontal sections. The top section contains the text 'srsran::srs_cu_cp::' and 'rrc_freq_hop' on two lines. The middle and bottom sections are empty.

+b_hop
+b_srs
+c_srs
