

std::true_type

The diagram illustrates an inheritance relationship. At the bottom is a gray rectangular box representing the base class `is_char<wchar_t>`. It is divided into three horizontal sections, with the top section containing the text `is_char<wchar_t>`. Above this box is a white rectangular box representing the derived class `std::true_type`. It is also divided into three horizontal sections, with the top section containing the text `std::true_type`. A blue arrow points from the top center of the gray box to the bottom center of the white box, indicating that `std::true_type` inherits from `is_char<wchar_t>`.

is_char< wchar_t >
