

`std::false_type`

```
graph BT; A["srslog::detail::is_byte_iterable< typename, typename >"] --> B["std::false_type"]
```

The diagram illustrates an inheritance relationship. At the bottom is a gray rectangular box representing the base class `srslog::detail::is_byte_iterable< typename, typename >`. It is divided into three horizontal sections, with the first section containing the class name. A blue arrow points upwards from the top center of this box to the bottom center of a white rectangular box above it. The white box represents the derived class `std::false_type` and is also divided into three horizontal sections, with the top section containing the class name.

`srslog::detail::is  
_byte_iterable< typename,  
typename >`
