

std::true_type

```
classDiagram
    class std_true_type["std::true_type"]
    class srsran_is_complex["srsran::is_complex< std::complex< T > >"]
    srsran_is_complex --|> std_true_type
```

The diagram illustrates an inheritance relationship. At the top is a white box representing the base class `std::true_type`, which is divided into three horizontal sections. Below it is a gray box representing the derived class `srsran::is_complex < std::complex< T > >`, also divided into three horizontal sections. A blue arrow with an open triangular head points from the top section of the gray box to the bottom section of the white box, indicating that the gray box inherits from the white box.

srsran::is_complex
< std::complex< T > >
