

uint8_t

```
classDiagram
    class uint8_t {
    }
    class struct {
        +max_num_add_pci_case1_r17
        +max_num_add_pci_case2_r17
    }
    uint8_t o-- struct
```

The diagram shows a class named 'uint8_t' at the top, represented as a rectangle with three horizontal compartments. The top compartment contains the text 'uint8_t'. A blue line extends from the bottom compartment of 'uint8_t' down to a diamond-shaped connector. This connector is positioned above a larger, grey-shaded rectangular box. To the right of the blue line, there are two lines of text: '+max_num_add_pci_case1_r17' and '+max_num_add_pci_case2_r17'. The grey box contains the text 'asn1::rrc_nr::mimo_params_per_band_s::mtrp_inter_cell_r17_s' in its top compartment, with two empty compartments below it.
