

std::false\_type

```
graph BT; A["srsran::detail::is_llr_span_compatible<T, typename>"] --> B["std::false_type"]
```

The diagram illustrates an inheritance relationship. At the bottom is a gray box representing the base class `srsran::detail::is_llr_span_compatible<T, typename>`. A blue arrow points upwards from this box to a white box at the top representing the derived class `std::false_type`. Both boxes are divided into three horizontal sections. The top section of each box contains the class name, while the middle and bottom sections are empty.

srsran::detail::is  
\_llr\_span\_compatible  
< T, typename >
