

options

```
classDiagram
    class options {
    }
    class "asn1::flap::deactiv_trace_ies_o::value_c::types_opts" {
    }
    options o--> "asn1::flap::deactiv_trace_ies_o::value_c::types_opts" : +value
```

The diagram shows a class named 'options' at the top, represented by a rectangle divided into three horizontal sections. The top section contains the text 'options'. Below it is a blue line representing an aggregation relationship, ending in a hollow diamond. To the right of this line is the label '+value'. This line connects to a larger, shaded gray rectangle at the bottom. This rectangle is also divided into three horizontal sections. The top section contains the text 'asn1::flap::deactiv_trace_ies_o::value_c::types_opts'. The middle section is empty. The bottom section contains the text '+ to_string()'.

+value

asn1::flap::deactiv
_trace_ies_o::value
_c::types_opts

+ to_string()
