

ErrorHandler

```
classDiagram
    class ErrorHandler
    class detail_cstring_type_checker["detail::cstring_type_checker< ErrorHandler >"]
    detail_cstring_type_checker --|> ErrorHandler
```

The diagram shows a class hierarchy. At the top is a box for the 'ErrorHandler' class, divided into three horizontal sections. Below it is a box for the 'detail::cstring_type_checker< ErrorHandler >' class, also divided into three sections. A blue arrow with an open triangular head points from the top section of the lower class to the bottom section of the 'ErrorHandler' class, indicating inheritance.
