

uint8\_t

The diagram illustrates a pointer relationship between a variable and a struct field. At the top, a white box with a black border represents a variable of type 'uint8\_t'. This box is divided into three horizontal sections, with the top section containing the text 'uint8\_t'. A blue line descends from the bottom of this box, passing through a blue diamond-shaped connector. To the right of the line, the text '+comb\_offset\_n4' and '+cyclic\_shift\_n4' is displayed in a light gray font. The line terminates at the top of a larger, gray-shaded box representing a struct. The top section of this gray box contains the text 'asn1::rrc\_nr::srs\_res\_s::tx\_comb\_c::n4\_s\_'. The gray box is also divided into three horizontal sections, with the top section containing the text.

+comb\_offset\_n4  
+cyclic\_shift\_n4
