

options

```
classDiagram
    class options {
    }
    class "asn1::flap::multicast" {
        _m_rbs_failed_to_be_setup
        _item_ies_o::value_c::types_opts
    }
    options o-- "asn1::flap::multicast" : +value
```

The diagram shows a class 'options' at the top with two empty compartments. Below it is a class 'asn1::flap::multicast' with three compartments. The first compartment contains the attributes '_m_rbs_failed_to_be_setup' and '_item_ies_o::value_c::types_opts'. The second compartment is empty. The third compartment contains the method '+ to_string()'. A blue line with an open diamond at the 'options' end connects to the 'asn1::flap::multicast' class, with the label '+value' placed to the right of the line.

+value

asn1::flap::multicast
_m_rbs_failed_to_be_setup
_item_ies_o::value_c::types_opts

+ to_string()
