

options

```
classDiagram
    class options {
    }
    class "asn1::elap::up_tnl_info_c::types_opts" {
    }
    options o-- "asn1::elap::up_tnl_info_c::types_opts" : +value
```

The diagram shows a class named 'options' at the top, represented by a rectangle divided into three horizontal compartments. The top compartment contains the text 'options', while the other two are empty. Below it is a class named 'asn1::elap::up\_tnl\_info\_c::types\_opts', represented by a rectangle divided into three horizontal compartments. The top compartment contains the text 'asn1::elap::up\_tnl\_info\_c::types\_opts', the middle compartment is empty, and the bottom compartment contains '+ to\_string()'. A blue line connects the bottom of the 'options' class to the top of the 'asn1::elap::up\_tnl\_info\_c::types\_opts' class. This line features a blue open diamond at the 'asn1::elap::up\_tnl\_info\_c::types\_opts' end, indicating an aggregation relationship. To the right of the line, the text '+value' is written in a light gray font.

+value

asn1::elap::up\_tnl  
\_info\_c::types\_opts

+ to\_string()
