

std::true_type

```
graph BT; A[is_char<wchar_t>] --> B[std::true_type];
```

The diagram illustrates an inheritance relationship. At the bottom is a gray rectangular box representing the base class, labeled 'is_char<wchar_t>'. It is divided into three horizontal sections, with the top section containing the text. A blue arrow points upwards from the top center of this box to the bottom center of a white rectangular box above it. The white box represents the derived class, labeled 'std::true_type', and is also divided into three horizontal sections, with the top section containing the text.

is_char< wchar_t >
