

options

```
classDiagram
    class options {
    }
    class "asn1::ngap::cfg_tac_ind_opts" {
    }
    options o-- "asn1::ngap::cfg_tac_ind_opts" : +value
```

The diagram illustrates an aggregation relationship between two classes. The top class, 'options', is represented by a white rectangle with a black border and is divided into three horizontal sections. The bottom class, 'asn1::ngap::cfg\_tac\_ind\_opts', is represented by a gray rectangle with a black border and is divided into three horizontal sections. A blue line connects the bottom section of 'options' to the top section of 'asn1::ngap::cfg\_tac\_ind\_opts', ending in a blue open diamond. To the right of this line is the label '+value'.
