

srsran::channel\_estimate  
::get\_channel\_state\_information

srsran::channel\_estimate  
::get\_snr\_dB

srsran::channel\_estimate  
::get\_snr

```
graph LR; A[srsran::channel_estimate::get_channel_state_information] --> C[srsran::channel_estimate::get_snr]; B[srsran::channel_estimate::get_snr_dB] --> C;
```

The diagram illustrates a dependency or inheritance relationship. Two source functions, 'srsran::channel\_estimate::get\_channel\_state\_information' and 'srsran::channel\_estimate::get\_snr\_dB', are shown on the left. Arrows from both of these functions point to a single target function, 'srsran::channel\_estimate::get\_snr', which is highlighted with a gray background on the right.
