

options

```
classDiagram
    class options {
    }
    class "asn1::rrc_nr::sl_pqi_r16_c::types_opts" {
    }
    options o-- "asn1::rrc_nr::sl_pqi_r16_c::types_opts" : +value
```

The diagram shows a class named 'options' at the top, represented by a rectangle divided into three horizontal sections. The top section contains the text 'options'. Below it is a blue line representing an aggregation relationship, which ends in a blue open diamond. To the right of this line is the label '+value'. The diamond is connected to the top of a larger, shaded gray rectangle representing the class 'asn1::rrc_nr::sl_pqi_r16_c::types_opts'. This rectangle is divided into three horizontal sections: the top section contains the class name, the middle section is empty, and the bottom section contains the text '+ to_string()'.

+value

asn1::rrc_nr::sl_pqi
_r16_c::types_opts

+ to_string()
