

options

```
classDiagram
    class options {
    }
    class "asn1::ngap::global_line_id_ext_ies_o::ext_c::types_opts" {
        + to_string()
    }
    options o--> "asn1::ngap::global_line_id_ext_ies_o::ext_c::types_opts" : +value
```

The diagram shows a class named 'options' at the top, represented by a rectangle with three horizontal compartments. The top compartment contains the text 'options'. Below it is a blue line representing an aggregation relationship, which ends in a blue open diamond. To the right of this line is the text '+value'. The diamond points to a larger, shaded gray rectangle representing another class. This rectangle is divided into three horizontal compartments. The top compartment contains the text 'asn1::ngap::global_line_id_ext_ies_o::ext_c::types_opts'. The middle compartment is empty. The bottom compartment contains the text '+ to_string()'.

+value
