

options

```
classDiagram
    class options {
        <empty>
        <empty>
    }
    class "asn1::elap::eutran" {
        _gnb_cu_up_counter_check
        _request_o::value_c::types_opts
        <empty>
        + to_string()
    }
    options o--> "asn1::elap::eutran" : +value
```

The diagram shows a class named 'options' with two empty compartments. It is connected by a blue line with an open diamond at the 'asn1::elap::eutran' class, indicating an aggregation relationship. The association is labeled '+value'.

+value

asn1::elap::eutran
_gnb_cu_up_counter_check
_request_o::value_c::types_opts

+

to_string()
