

format\_part< Char >

```
classDiagram
    class format_part {
    }
    class detail__format_part_array {
    }
    format_part o-- detail__format_part_array : +data
```

The diagram shows two classes. The top class, `format_part< Char >`, is represented by a white box with a black border and is divided into three horizontal sections. The bottom class, `detail::format_part_array< Char, N >`, is represented by a gray box with a black border and is also divided into three horizontal sections. A blue line connects the bottom section of the top class to the top section of the bottom class. This line ends in a hollow blue diamond, indicating an aggregation relationship. To the right of the line, the text `+data` is written in gray.

+data
