

options

```
classDiagram
    class options {
    }
    class "asn1::rrc_nr::iab_ip_usage_r16_opts" {
    }
    options o-- "asn1::rrc_nr::iab_ip_usage_r16_opts" : +value
```

The diagram shows a class named 'options' at the top, represented by a rectangle with two empty compartments below the name. Below it is a class named 'asn1::rrc_nr::iab_ip_usage_r16_opts', represented by a shaded rectangle with two compartments. The top compartment of the shaded class contains the class name. The bottom compartment contains a plus sign followed by the text 'to_string()'. A blue line connects the bottom of the 'options' class to the top of the shaded class, ending in a hollow diamond, which signifies an aggregation relationship. To the right of this line, the text '+value' is written.

+value

asn1::rrc_nr::iab_ip
_usage_r16_opts

+ to_string()
