

std::false_type

```
classDiagram
    class std_false_type["std::false_type"]
    class srslog_detail_is_in_place_type_t["srslog::detail::is_in_place_type_t< T >"]
    std_false_type <|-- srslog_detail_is_in_place_type_t
```

The diagram illustrates an inheritance relationship. At the top is a white rectangular box representing the base class 'std::false_type'. It is divided into three horizontal sections: the top section contains the text 'std::false_type', and the two bottom sections are empty. Below this box is a blue arrow pointing upwards, indicating inheritance. At the bottom is a gray rectangular box representing the derived class 'srslog::detail::is_in_place_type_t< T >'. It is also divided into three horizontal sections: the top section contains the text 'srslog::detail::is_in_place_type_t< T >', and the two bottom sections are empty.

srslog::detail::is_in_place_type_t< T >
