

uint32_t

```
classDiagram
    class uint32_t {
    }
    class srsran_pdcp_rx_state["srsran::pdcp_rx_state"] {
    }
    uint32_t o-- "1" srsran_pdcp_rx_state
```

The diagram illustrates an aggregation relationship between a `uint32_t` type and the `srsran::pdcp_rx_state` class. The `uint32_t` is represented as a class with three empty compartments. The `srsran::pdcp_rx_state` is represented as a class with three empty compartments. A blue line with an open diamond at the `srsran::pdcp_rx_state` end connects the two. To the right of the line, the following attributes are listed: `+rx_deliv`, `+rx_next`, and `+rx_reord`.

+rx_deliv
+rx_next
+rx_reord

srsran::pdcp_rx_state
