

std::false_type

```
classDiagram
    class std_false_type["std::false_type"]
    class srsran_srsvec_detail_is_span_compatible["srsran::srsvec::detail::is_span_compatible<T, typename>"]
    srsran_srsvec_detail_is_span_compatible --|> std_false_type
```

The diagram illustrates a C++ inheritance relationship. At the top is a white rectangular box representing the base class `std::false_type`. It is divided into three horizontal sections: the top section contains the text `std::false_type`, and the two bottom sections are empty. Below this box is a blue hollow triangle pointing upwards, indicating inheritance. At the bottom is a gray rectangular box representing the derived class `srsran::srsvec::detail::is_span_compatible<T, typename>`. It is also divided into three horizontal sections: the top section contains the text `srsran::srsvec::detail::is_span_compatible<T, typename>`, and the two bottom sections are empty.

srsran::srsvec::detail
::is_span_compatible<
T, typename >
