

options

```
classDiagram
    class options {
        +value
    }
    class "asn1::flap::ssb_tx_periodicity_opts" {
        +to_string()
        +to_number()
    }
    options o--"asn1::flap::ssb_tx_periodicity_opts" : +value
```

The diagram shows a class 'options' at the top with three empty slots. Below it is a class 'asn1::flap::ssb_tx_periodicity_opts' with two methods: '+ to_string()' and '+ to_number()'. A blue line with an open diamond at the 'options' end connects to the 'asn1::flap::ssb_tx_periodicity_opts' class. The label '+value' is placed next to the line.

+value

asn1::flap::ssb_tx
_periodicity_opts

+ to_string()

+ to_number()
