

options

```
classDiagram
    class options {
    }
    class "asn1::e2sm_rc::enb_id_c::types_opts" {
    }
    options o--> "asn1::e2sm_rc::enb_id_c::types_opts" : +value
```

The diagram illustrates a class hierarchy or aggregation. The 'options' class at the top has two empty slots below its name. It is connected by a blue line with an open diamond at the bottom to the 'asn1::e2sm_rc::enb_id_c::types_opts' class. The label '+value' is placed to the right of the connecting line. The 'asn1::e2sm_rc::enb_id_c::types_opts' class is shaded gray and contains the text '+ to_string()' in its bottom section.

+value

asn1::e2sm_rc::enb
_id_c::types_opts

+ to_string()
