

uint8_t

The diagram illustrates a pointer relationship between a variable and a specific byte in a structure. At the top, a white box represents a variable of type 'uint8_t'. It is divided into three horizontal sections, with the top section containing the text 'uint8_t'. A blue line descends from the bottom of this box. To the right of the line, the text '+comb_offset_n4' and '+cyclic_shift_n4' is displayed in a light gray font. The line terminates in a blue diamond shape, which points to the top section of a larger, gray-shaded box below. This gray box represents a structure and is also divided into three horizontal sections. The top section contains the text 'asn1::flap::tx_comb_pos_c::n4_s_'. The middle and bottom sections are empty.

+comb_offset_n4
+cyclic_shift_n4

asn1::flap::tx_comb
_pos_c::n4_s_
