

std::true_type

```
graph BT; A["detail::is_reference_wrapper< std::reference_wrapper< T > >"] --> B["std::true_type"]
```

The diagram illustrates an inheritance relationship. A light gray box at the top represents the base class `std::true_type`. It has three horizontal sections: the top one contains the text `std::true_type`, and the two below it are empty. A blue arrow points upwards from a darker gray box below to the bottom edge of the `std::true_type` box. The darker gray box represents the derived class `detail::is_reference_wrapper< std::reference_wrapper< T > >`. It also has three horizontal sections: the top one contains the text `detail::is_reference_wrapper< std::reference_wrapper< T > >`, and the two below it are empty.
