

options

```
classDiagram
    class options {
        <empty>
        <empty>
    }
    class "asn1::flap::tx_stop_ind_opts" {
        <empty>
        + to_string()
    }
    options o--> "asn1::flap::tx_stop_ind_opts" : +value
```

The diagram shows a class 'options' at the top with two empty compartments. Below it is a class 'asn1::flap::tx_stop_ind_opts' with three compartments: the top one is empty, the middle one is empty, and the bottom one contains '+ to_string()'. A blue line with an open diamond at the 'options' end connects to the top of the 'asn1::flap::tx_stop_ind_opts' class. The label '+value' is placed to the right of the line.

+value

asn1::flap::tx_stop
_ind_opts

+ to_string()
