

options

```
classDiagram
    class options {
    }
    class "asn1::rrc_nr::rach" {
        _cfg_common_s::ssb_per
        _rach_occasion_and_cb
        _preambs_per_ssb_c_::one_opts
    }
    options o-- "asn1::rrc_nr::rach" : +value
```

The diagram shows a class 'options' at the top with two empty compartments. Below it is a class 'asn1::rrc\_nr::rach' with three compartments. The top compartment contains the attributes '\_cfg\_common\_s::ssb\_per', '\_rach\_occasion\_and\_cb', and '\_preambs\_per\_ssb\_c\_::one\_opts'. The bottom compartment contains two methods: '+ to\_string()' and '+ to\_number()'. A blue line with an open diamond at the 'options' end connects to the top of the 'asn1::rrc\_nr::rach' class, with the label '+value' placed next to the line.

+value

asn1::rrc\_nr::rach  
\_cfg\_common\_s::ssb\_per  
\_rach\_occasion\_and\_cb  
\_preambs\_per\_ssb\_c\_::one\_opts

+ to\_string()

+ to\_number()
