

options

```
classDiagram
    class options {
    }
    class "asn1::ngap::twif_id_c::types_opts" {
    }
    options o-- "asn1::ngap::twif_id_c::types_opts" : +value
```

The diagram illustrates a class hierarchy or composition. The 'options' class at the top has two empty slots below its name. The 'asn1::ngap::twif_id_c::types_opts' class at the bottom has a third slot containing '+ to_string()'. A blue line with an open diamond at the 'options' end connects the two classes, with the label '+value' placed to the right of the line.

+value

asn1::ngap::twif_id
_c::types_opts

+ to_string()
