

options

```
classDiagram
    class options {
    }
    class "asn1::rrc_nr::mib_s::cell_barred_opts" {
    }
    options o-- "asn1::rrc_nr::mib_s::cell_barred_opts" : +value
```

The diagram shows a class named 'options' at the top, represented by a white rectangle with a black border and two empty internal compartments. Below it is a class named 'asn1::rrc_nr::mib_s::cell_barred_opts', represented by a grey rectangle with a black border and two internal compartments. A blue line connects the bottom of the 'options' class to the top of the 'asn1::rrc_nr::mib_s::cell_barred_opts' class, ending in a blue open diamond, which signifies an aggregation relationship. To the right of this line, the text '+value' is written in grey.

+value

asn1::rrc_nr::mib_s
::cell_barred_opts
