A diagram illustrating file dependencies. At the top is a dark gray box containing the header file path: lib/phy/upper/channel_processors/pdsch_encoder_impl.h. Below it are two light gray boxes. The left box contains lib/phy/upper/channel_processor_factories.cpp, and the right box contains lib/phy/upper/channel_processors/pdsch_encoder_impl.cpp. Two blue arrows point from the bottom of each light gray box to the bottom of the dark gray box, indicating that both source files include the header file.
