

options

```
classDiagram
    class options {
    }
    class "asn1::ngap::tngf_id_c::types_opts" {
    }
    options o-- "asn1::ngap::tngf_id_c::types_opts" : +value
```

The diagram illustrates a class hierarchy or composition. The 'options' class at the top has two empty slots below its name. It is connected by a blue line with an open diamond at the bottom to the 'asn1::ngap::tngf_id_c::types_opts' class. The label '+value' is placed to the right of the connecting line. The 'asn1::ngap::tngf_id_c::types_opts' class is shaded gray and contains a '+' sign followed by 'to_string()' in its bottom slot.

+value

asn1::ngap::tngf_id
_c::types_opts

+ to_string()
